

Battery-box VEOBOX II

TECHNICAL SPECIFICATIONS

Input voltage	-100 / 110 / 230 VAC – 50 / 60Hz (linear transformer) -100~240 VAC – 50 / 60Hz (Switch Mode Power Supply)
Output voltage	24 VDC
Power / current	maximum 9 A at 24 VDC
Actuator connections	from 1 to 2
Control connection	1
Built-in charger function	- with battery level displayed on LCD screen -buzzer and visual alarm in case of low voltage
Soft start and stop	on output of main actuator
Completion of number of cycles	count by timer (for maintenance)
Over-load protection	adjustable from 5A to 9A per output (with alarm)
Over-duty protection	by software control (with alarm)
Protection grade	IP65
Batteries	2 x batteries 12V - 5 A/H
Duty cycle	10% (2 mn operation / 18 mn rest)
Safety function	emergency stop button
Protection grade	IP65
Colour	-front housing RAL 7035 (light grey) -back housing RAL 7016 (dark grey)

Options :

Batteries level indicator	on LCD screen on battery-pack
Smart charging function	for balanced recharge/discharge of batteries
Batteries additional recharge	on external charger
