

## TECHNICAL SPECIFICATIONS

|                        |                                       |
|------------------------|---------------------------------------|
| Input voltage          | 12 Volts CC or 24 Volts CC            |
| Operation power        | 160 Watts maximum                     |
| Starting torque        | 2 Nm maximum                          |
| Rotation direction     | clockwise or anti-clockwise           |
| Rotation speed         | 3500 rpm maximum                      |
| Current consumption    | 12.5 A                                |
| Drive                  | cylindrical output with drilled shaft |
| Sealing protection     | IP22                                  |
| Operating temperatures | -30° to +80° C                        |
| Operation lifetime     | 2000 hours in continuous operation    |
| Inductors              | magnets                               |
| Weight                 | 1.4 Kg                                |
